## Technical Skills

JS (React, Node, Backbone), AWS, Chrome Extension, Firebase, Scheme, Python, Elixir, Java, C, UNIX

## Technical Work Experience

**Software Engineer, HubSpot, Cambridge, MA** July – December 2017

- Shipped front end features daily to hundreds of thousands of HubSpot CRM users.
- Focused on user testing and product decision making to help solve for customers first.

**Software Engineer, Appcues, Boston, MA** July – December 2016

- Returned to Appcues to join 14+ employees on a mission for growth and engineering refinement.
- Shipped code daily to be integrated alongside customers' applications, building features in our API and JS SDK.
- Participated in product development meetings, planning engineering tasks and advocating for customers.

April – July 2015

- Returned to Appcues to join 4 employees for a second summer internship.

April – October 2014

- Hired as first employee to set the foundation for the company and our customers.
- Communicated directly with customers to patch bugs, design, build, and test new and existing features.

**Software Engineer, Ronik Design, Brooklyn, NY** July – December 2015

- Led websites through the whole development process, concept to production to iteration.
- Made design decisions to produce award-winning web experiences for several clients.

## Other Experience

**Tutor/Teaching Assistant, Northeastern University, Boston, MA** January – May 2018

- Created and graded assignments; gave feedback on students' projects.

**Student Leader, NEU Program for Undeclared Students, Boston, MA** April 2014 – January 2015

- Taught undeclared first-semester freshmen seminars, serving as a Peer Mentor to students.

## Interests

Reading, camping, BBQing, skiing, snowboarding, making (and drinking) coffee, making (and drinking) beer, learning to play the piano, and dreaming of opening a café
